

No specific department or individual decides where the information security function should go. The different committees of interest within the organization must find a rational compromise by placing the function where it can best balance the enforcement needs of organizational policy with the education, training, awareness, and awareness services needed to make information security part of the organizational culture.

- The IT function, as a part of other functions such as networks, applications development, and the help desk
- The physical security function, as a part of protective services
- Administrative services, as a part of human resources or purchasing
- The insurance and risk management function, because compromising security can create great risk for the company
- The legal department, for enforcement of security policies

The advantage of placing information security within the IT function is that it has a more technical view of how to protect the information. The disadvantage is
