For over 35 years, radio astronomical techniques have made an impressive series of advances in our understanding of solar phenomena. However, although the subject has been partially discussed in "Paris Symposium on Radio Astronomy" in 1958, NASA-GSFC Symposium on "Physics of Solar Flares" in 1963...

Mukul Ranjan Kundu: Physics Today: Vol 64, No 4

The author reviews and coordinates the observations, interpretations, and the associations of the sun's radio emissions and shows the extent to which they contribute to the understanding of solar physics and the sun earth environment. Different kinds of solar radio emission are described in detail- the quiet and the active sun and their relations with the optical sun, solar x-rays, cosmic rays ...
