The GAMP ® Good Practice Guide: A Risk-Based Approach to Operation of GxP Computerized Systems highlights the importance of the operation phase of the system lifecycle, when it is more likely that the return on investment will be achieved for the significant time and resources expended in implementing new computerized systems. The Guide will help regulated organizations create regulated computerized systems that are fit for intended use and compliant with applicable regulations and provides ...

GAMP Good Practice Guide: Operation of GxP Computerized ...

This position paper proposes a risk-based approach to manage GxP system configuration changes and release updates without compromising the quality of the "system product" or the integrity of the validated state, and is developed to align with ICH Q7, ICH Q9, ICH Q10, and GAMP 5.

A Risk-based Approach to Change Management of Validated ...

Recovery from a failure to maintain control of a regulated system during the operation phase can be both time-consuming and expensive, and increase the risk to data integrity, product quality, and patient safety. During the operational life of a GxP system regulators usually focus on the integrity, consistency, and completeness of controls required to maintain compliance. This Guide highlights the importance of the operation phase of the system lifecycle, when the return on investment for ...

Table of Contents

What this means is that a risk-based life cycle management approach with relevant scientific rationale and evidence can be used in lieu of a traditional top-down comprehensive approach. Many of us remember the golden rule of validation; triplicate test runs as an output of this classic approach. It didn't matter the complexity or simplicity of the system, just always apply the test in ...

A Risk-Based Approach to Validation - MasterControl

A Risk-Based Approach to Operation of GxP Computerized Systems. Manufacturing Execution Systems; The Good Practice Guides may be used in addition to the GAMP ® document. Within the ISPE special GAMP communities are operational. For the Belgium, Netherlands and Luxemburg area you can participate in the GAMP Benelux Community of Practice. ISPE GAMP document overview. The following diagram shows ...
